Disable Rainbow Splash Screen not working

According to elinux (http://elinux.org/RPiconfig), I should be able to disable the rainbox splashscreen by setting this option in the /boot/cmdline.txt file:

```
disable_splash if set to 1, avoids the rainbow splash screen on boot
```

My cmdline.txt looks like this:

```
dwc_otg.lpm_enable=0 console=ttyAMA0,115200 console=tty3 loglevel=1 root=/dev/mmcblk0p6
rootfstype=ext4 elevator=deadline rootwait quiet logo.nologo disable_splash=1
```

However, I still see the rainbox splash screen! I am using the latest Raspbian from NOOBS 1.3.9.

Why does that option not work?

Thanks!

raspbian   boot   display   boot-issues   cmdline.txt

1 Answer

You have edited the wrong file; disable_splash=1 should be in /boot/config.txt
